

TutorHere

a tutor whenever you need one!

CO3302 PROJECT

SATHISCHANDRA MKDTM

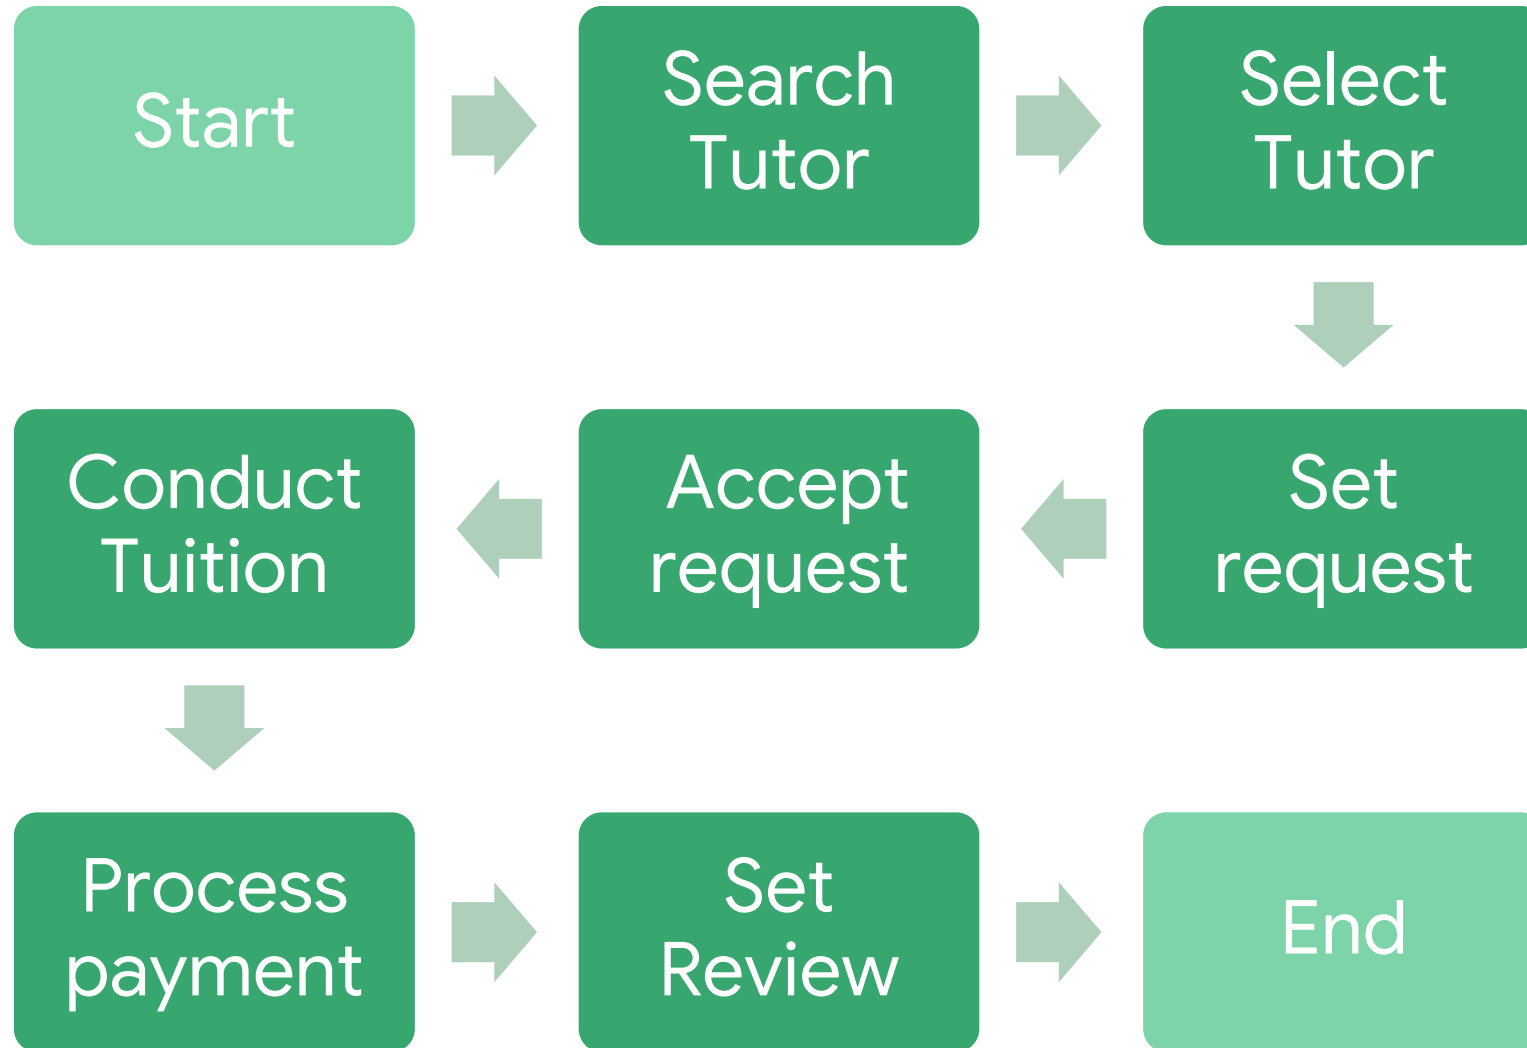

16/ENG/093

What is TutorHere?

- A online tutor hiring application
- A platform for Learners to find and request tutors
- A platform for Tutors to connect to the Learners and find tutoring opportunities

Basic flow of TutorHire

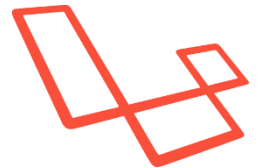

Features

- Finding tutors based on: Subject, Qualification level, Location, Hourly rate, Free timeslots, rating etc.
 - Tuition scheduling, Tutor contacting & Tutor rating system
-
- 2 main interfaces: Learner View & Tutor View
 - A web application (Support many platforms: Laptop, Tablet, Mobile etc.)

Technologies & Tools

- Web based
- Front-end: HTML, CSS, JS, VueJS
- Back-end: PHP, Laravel
- Database: MySQL
- Frameworks: VueJS, Laravel
- Other tools: VS Code, Adobe XD

How Feasible the Project is?

- **Cost:** Minimum at the initial development phases
 - Locally developed & tested, Free web services will be used
- **Budget:** Considerably manageable budget
- **Technology:** Free & Open Source technologies
 - Well-documented languages with large community support
 - Some technologies can be studied in parallel with project timeline
- **Timeliness:** Up and running with a well-planned timeline with Back-up plans also included
